

## **Group Technical Engineer Full-time Permanent Role Field based**

### **Overall Job Purpose:**

The main requirement of this role is to provide technical knowledge and support across the Group. When Group wide vehicle issues arise, you will be required to gain a technical understanding of the issue and communicate it across the Group; whilst also leading the development and implementation of practical solutions.

In addition, you will be required to liaise with the procurement department to provide technical assistance regarding parts tenders and parts supply.

### **Principal Accountabilities:**

- Collaborating with Operating Companies regarding the resolution of vehicle technical issues and monitoring their success.
- Sharing technical knowledge across the Group.
- Custodian of the Group's approval of safety critical parts
- Working with the procurement team regarding vehicle parts supply to ensure items meet the required standard. Evaluation of bidders and parts supplied.

### **Knowledge & Experience:**

- Experience of commercial vehicle repair and ideally be, at a minimum, qualified to HNC level in a technical discipline.
- Problem solving and root cause identification skills
- A good knowledge of current and developing bus industry vehicle technologies.
- Able to work effectively at all levels in an organisation.

Please submit a cover letter with current CV (in Word or PDF) to [engineeringrecruitment@go-ahead.com](mailto:engineeringrecruitment@go-ahead.com) and must be received by **31<sup>st</sup> January 2021**.
