

## Financial reporting

As a socially responsible organisation, transparency and openness are important to us. We are committed to the principles of good governance. Through our robust internal framework of systems and controls, we strive to maintain the highest standards and uphold our core values of trust and transparency.

We meet and exceed requirements to present fair, balanced and understandable information. We adopt all of the relevant laws and regulations in how we report. This approach is intended to build trust between business and society, through improved levels of transparency and disclosure, and our financial reports include clear narratives to help stakeholders fully understand our business.
