

Capital Build Manager - Infrastructure

Permanent

Matthew Parker Street (London)

Job Purpose:

As Capital Build Manager – Infrastructure in our Bus Division you will have demonstrable construction project management experience and will play a key role in the development and delivery of multiple projects with a team of Major and Minor works PMs to assist. This programme will include both new build, structural enhancement, and refurbishment schemes as well as the electrification of our garages. Reporting to the Head of Infrastructure you will be responsible for the day- to-day project and programme management including, leading projects from outline business case, through design, procurement, and delivery.

Key Accountabilities:

The Capital Project Manager will work collaboratively to inform building design and manage project delivery from conception to completion. You will ensure that projects are delivered in accordance with Go-Ahead's needs, statutory regulations, and to the agreed specification, whilst seeking to make improvements in environmental sustainability.

The post-holder will manage multiple projects and deploy a full range of skills in project management methodology including programme planning, reporting, budget management, risk management and cashflow forecasting. You will work with other team members to continuously improve project communication, delivery, processes and quality.

Experience of working on projects in a live, operational environment is critical, as is the ability to communicate effectively with a diverse range of stakeholder groups from within our operating companies. Although experience of working in the public transport sector is not essential, we are seeking candidates that demonstrate an understanding and enthusiasm for the positive contribution that buildings and the estate makes towards the delivery of our bus operations across the UK.

Working alongside our Zero Emissions team you will take an approved design and deliver the build projects that involve transforming our garages from their current Diesel reliant status to ensuring our journey to zero net carbon is achieved.

Knowledge & Experience:

- Degree or equivalent professional qualification or experience (at least 5 years) in a recognised project management, surveying or building/construction discipline
- Experience delivering capital projects with a value of up to £15 Million
- Experience managing, leading and influencing multi-disciplinary project teams, contractors and specialist consultants
- Knowledge of relevant legislation, regulations and quality standards
- Excellent IT skills for example, Microsoft Office Word, Excel, Project and MS Teams
- Self-starter, works well alone on own initiative and as part of a team

- Ability to research, write and present robust and comprehensive business cases
- Excellent interpersonal skills with the ability to communicate with people at all levels
- A full, valid UK driving license

To apply for this exciting opportunity to work in a growing team, please send a short covering letter and an up to date CV to Richard Harrington richard.harrington@go-ahead.com

The closing date for this role is on Friday 12 April 2024
