

Go-Ahead

Graduate Management Programme (Engineering)

Go-Ahead's two-year graduate engineering programme is incredibly varied and hands-on. Your role will not only involve vehicle maintenance, production and exposure to cutting-edge technologies, but, critically, people management and project planning. You can expect shift work and you'll be given real responsibility, not just shadowing, but managing your own engineering team within a garage. We care about your career, so through mentoring we hope to support you to become an Engineering Supervisor within two years, and a senior manager on track to be earning £35-40,000 per year within five years.

Salary:
minimum of
£25,000 per
year

Start date:
September
2020

Duration: two
years

Key requirements

- **A mechanical, automotive, electrical or electronic engineering degree**
- **Hands on experience with engines and motors and an understanding of how they work**
- **A passion for enhancing people's lives through public transport**
- **Full UK driving licence**
- **Commitment to relocate up to three times during the two-year programme**

What Go-Ahead can offer you

- Membership of IMechE and support to progress towards Chartered Engineer status
- Membership to the Young Bus Managers Network and the Chartered Institute of Logistics and Transport
- Full support from mentors, specialists and your own graduate community - we spend £22million per year on training and development, so make the most of what is on offer
- Opportunity to progress into an engineering supervisory position within 2 years
- Career progression – a senior manager role within five years – on track to be earning £35-40,000 per year
- Free travel on many of Go-Ahead's services
